

RAJU PULI

Frontend Engineer | React.js | Angular | Real-Time Applications

+91 9133443451 | rajupuli090322@gmail.com | linkedin.com/in/rajupuli | github.com/raju-puli | Hyderabad, India

Professional Summary

Frontend Engineer with **4+ years of experience** specializing in **React.js, Angular, and real-time web applications**. Started career building responsive, multilingual websites with Angular, then transitioned to React for high-performance gaming platforms. Successfully delivered applications serving **20,000+ concurrent users** with expertise in WebSockets, canvas rendering, and cross-platform builds.

Technical Skills

Frontend: React.js, Angular, JavaScript (ES6+), TypeScript, Redux, Hooks, Context API

Routing: React Router, Angular Router, Protected Routes, Lazy Loading

UI & Styling: HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, Responsive Design

Canvas & Animation: Konva.js, GSAP, Canvas API

Real-Time: WebSockets, Socket.io, REST APIs

State Management: Redux, Redux Toolkit, Context API, Memoization

Testing: Jest, React Testing Library (basic)

Tools: Git, GitHub, Bitbucket, Webpack, NPM, Chrome DevTools, VS Code

Cross-Platform: Cordova (APK, IPA, EXE, DMG)

Methodologies: Agile, Scrum, Code Reviews, CI/CD basics

Professional Experience

Frontend Developer

Mar 2022 – Present

Czar Gaming Pvt. Ltd., Hyderabad

Phase 1: Angular Website Development

Mar 2022 – Dec 2022

- Developed and maintained multiple production websites including **Playbet**, **Rajpoker**, **RiverPoker**, **ClanSaga**, and **SouthRummy** etc., using Angular.
- Implemented **payment gateway integrations** with secure transaction flows and validation.
- Built **multi-currency exchange systems** with real-time conversion rates and wallet balance management.
- Added **multi-language support** (English, Portuguese, Spanish, Parthian, etc.,) using Angular i18n, improving user accessibility.
- Designed **fully responsive websites** ensuring seamless experience across desktop, tablet, and mobile.
- Optimized website performance using lazy loading, CDN integration, and image optimization.

Phase 2: React Game Development

Jan 2023 – Present

- Transitioned to React.js for building **real-time multiplayer poker and gaming platforms**.
- Implemented **WebSocket connections** for real-time game events, player actions, and live updates.
- Developed interactive game UIs using **Konva and GSAP** for smooth animations and canvas rendering.
- Designed **multi-table support** allowing users to play across multiple game tables simultaneously.
- Created **cross-platform builds** using Cordova - generated APK (Android), IPA (iOS), EXE (Windows), and DMG (macOS) installers.
- Implemented Redux-based state management with memoization, reducing rendering time by **30%**.

- Built **responsive game interfaces** optimized for mobile, tablet, and desktop views.
- Integrated REST APIs for user authentication, leaderboards, transactions, and game history.
- Implemented **React Router** for seamless navigation between game lobbies, tables, and user profiles.

Key Achievements

- Successfully launched gaming platform serving **20,000+ concurrent active users**.
- Reduced initial load time by **40%** through code splitting and lazy loading.
- Achieved **95+ Lighthouse scores** for performance and accessibility.
- Delivered desktop and mobile builds across 4 platforms (Android, iOS, Windows, macOS).
- Improved real-time responsiveness with WebSocket optimizations and state management.

Key Projects

Real-Time Poker Gaming Platform (React + WebSockets)

- Full gameplay interface with card rendering, player interactions, and real-time updates.
- Implemented WebSocket for live game events, player actions, and table management.
- Cross-platform mobile and desktop builds via Cordova.
- Technologies: React, Redux, Konva.js, GSAP, WebSockets, Cordova.

Multi-Currency Gaming Websites (Angular)

- Built 10+ branded websites with responsive design and multi-language support.
- Integrated payment gateways and currency exchange with real-time conversion.
- Technologies: Angular, TypeScript, Bootstrap, REST APIs.

Education

B.Sc. (MECS) — SR & BGNR Govt. Arts & Science College, K.U, Khammam
CGPA: 7.32 / 10

2021

Certifications

- **Python Programming** — Hope Foundation; passed final assessment.
- **Web Development** — Online certification with assessment completion.

Core Strengths

- **Real-Time Expertise:** WebSockets, live updates, concurrent user handling
- **Performance Optimization:** Memoization, lazy loading, Lighthouse audits
- **Cross-Platform Development:** Cordova builds for mobile and desktop
- **Clean Code:** Modular architecture, reusability, and maintainability
- **Collaborative:** Agile, Scrum, effective code reviews

Career Vision

Passionate about building high-performance, real-time web applications. Looking to grow into a **Full-Stack Developer** with backend expertise in **Node.js, Java, and Python** while contributing to scalable system architecture and end-to-end product development.

Job Preferences

- Frontend Engineer / React Developer / UI Engineer
- Product-based companies, Gaming Platforms, FinTech
- Real-time applications and performance-critical systems
