## Professional Summary

React developer with **4+ years** of experience building high-scale web applications with **React 18+** and **TypeScript**. Built and scaled a real-time gaming platform handling **20,000+ concurrent users** using **React, Redux Toolkit, and WebSockets**. Passionate about **performance optimization, clean code architecture**, and delivering **seamless user experiences**. Proficient in modern React patterns including hooks, custom hooks, and context-based state management. Seeking challenging React.js roles where I can leverage my expertise in building scalable, high-performance applications.

## Core Skills

|                              |                                                                                                                                                      |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>React Ecosystem</b>       | React 18+, React Router v6, Redux Toolkit, RTK Query, Zustand, Context API, Hooks, Custom Hooks                                                      |
| <b>TypeScript/JS</b>         | TypeScript 5+, JavaScript ES6+, Async/Await, Functional Programming                                                                                  |
| <b>UI &amp; Styling</b>      | HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Styled Components, Responsive Design                                                                     |
| <b>Real-Time Performance</b> | WebSockets, Socket.io, REST APIs, GraphQL basics, Axios, Lighthouse, Chrome DevTools, Bundle Optimization, Memoization, Code Splitting, Lazy Loading |
| <b>Testing</b>               | Jest, React Testing Library, Cypress basics                                                                                                          |
| <b>Tools &amp; DevOps</b>    | Git, Webpack, Vite, Cordova, NPM/Yarn, Docker basics, CI/CD, Agile/Scrum                                                                             |
| <b>Form Handling</b>         | React Hook Form, Formik, Zod, Yup                                                                                                                    |

## Professional Experience

**Frontend Developer** Mar 2022 – Present  
*Czar Gaming Pvt. Ltd., Hyderabad*

**React Developer** Jan 2023 – Present

- Engineered a **real-time multiplayer poker platform** serving **20,000+ concurrent users** with React 18 and TypeScript.
- Integrated **WebSocket connections** for live game events — player actions, table updates, and instant notifications with **<200ms latency**.
- Used **Konva.js** and **GSAP** to build smooth card animations and interactive game UI at **60 FPS**.
- Optimized Redux state with **memoized selectors**, cutting unnecessary re-renders by **30%**.
- Implemented **code splitting and lazy loading**, reducing initial bundle from **4.2MB to 1.8MB (57% reduction)**.
- Refactored class components to **functional components with hooks**, improving code readability by **40%**.
- Built **multi-table support** allowing users to play across multiple tables simultaneously.
- Delivered **cross-platform builds** using Cordova — APK, IPA, EXE, and DMG installers.
- Achieved **95+ Lighthouse scores** for Performance, Accessibility, and Best Practices.
- Wrote **90+ unit tests** with **Jest & React Testing Library** to ensure code reliability.

**Angular Developer** Mar 2022 – Dec 2022

- Built and maintained **10+ multilingual gaming websites** including Playbet, Rajpoker, RiverPoker, ClanSaga, SouthRummy.
- Integrated **payment gateways** with secure transaction handling and validations using Angular forms.
- Added **multi-language support** (English, Portuguese, Spanish) using Angular i18n.

- Optimized performance with lazy loading, CDN integration, and image compression.

## Key Achievements

- **20K+ Daily Users** — Successfully launched and maintained platform with 20,000+ active players.
- **57% Bundle Reduction** — Reduced initial bundle size from 4.2MB to 1.8MB through code optimization.
- **30% Performance Gain** — Reduced re-renders through optimized Redux selectors and memoization.
- **95+ Lighthouse Scores** — Achieved top marks across Performance, Accessibility, and Best Practices.
- **4 Platforms, 1 Codebase** — Delivered production builds for Android, iOS, Windows, and macOS.
- **40% Faster Feature Delivery** — Built reusable component library reducing development time.

## Projects

### Real-Time Poker Platform

- Engineered a full-featured poker game interface with smooth animations and real-time updates.
- Implemented WebSocket connections for live game sync with **<200ms latency**.
- Built **15+ custom React hooks** (useGameState, useSocket, usePlayerActions) for reusable logic.
- Optimized rendering with memoization, achieving **60 FPS** consistency.
- Achieved **Lighthouse scores: Performance 95, Accessibility 98, Best Practices 96**.
- *Tech: React 18, TypeScript, Redux Toolkit, RTK Query, WebSocket, Konva.js, GSAP, Tailwind CSS*

### Personal Portfolio & Component Library

- Built a modern portfolio showcasing React projects with dark mode, animations, and responsive design.
- Created a reusable component library with 12+ components documented using Storybook.
- *Tech: React.js, TypeScript, Tailwind CSS, Framer Motion, Storybook*

## Education

### B.Sc. in Mathematics, Electronics & Computer Science

2018 – 2021

SR & BGNR Govt. Arts & Science College, Kakatiya University, Khammam  
CGPA: 7.32 / 10

**Relevant Coursework:** Data Structures, Web Development, Database Management, Computer Networks

## Certifications & Learning

- **React - The Complete Guide** — Udemy (2023)
- **TypeScript Mastery** — Frontend Masters (2024)
- **Advanced React Patterns** — Egghead.io (2024)

## What I Bring

- **React Expertise** — Write clean, reusable, performant components with modern React patterns.
- **Real-Time Systems** — Built WebSocket apps handling **20,000+ concurrent users**.
- **Performance Obsession** — Cut load times by **57%** and re-renders by **30%**.
- **Cross-Platform Delivery** — Shipped Cordova apps to Android, iOS, Windows, macOS.
- **Clean Code Advocate** — Modular architecture, thorough testing, and code reviews.
- **Team Collaboration** — Agile, mentoring, cross-functional teamwork.
